

Paint with a living microbial color palette from the neighborhood!

Join us for an exciting hands-on Bio-Art Workshop, where science meets creativity!

BioArtBot.org

LIVING COLORS

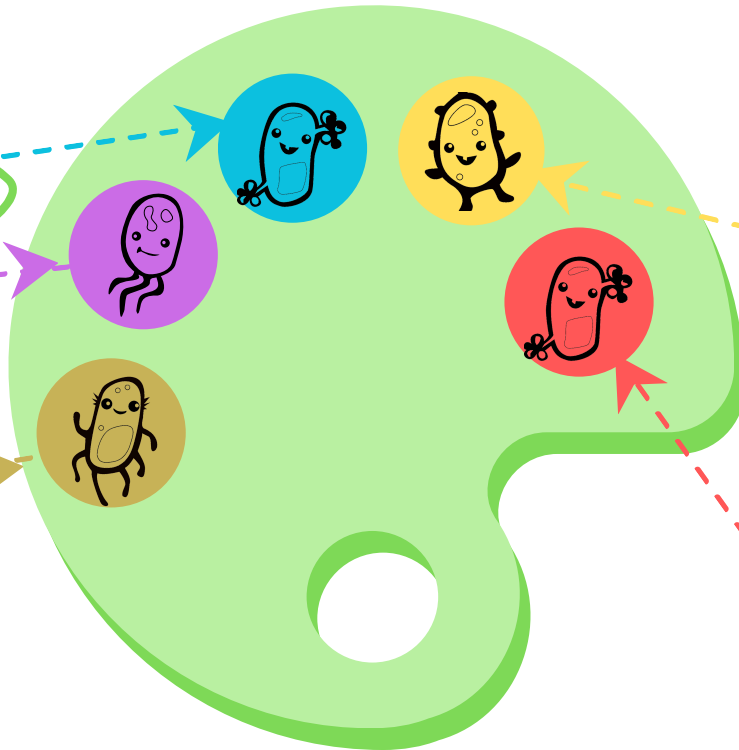

Don't miss this unique opportunity to blend art, biology & technology!

Before the Workshop:

Use an online tool to design a bio-art piece.
Your artwork will be robotically printed and growing in time for the event!

During the Workshop:

- Discover the science behind microbial art
- Handcraft new bio-art with living organisms
- Print a final piece with the group
- Take home a custom journal & photos
